

# Formech HD Series 3

## Automatic Vacuum Forming Machines

First introduced in 2002, Formech's HD range established a new price-performance ratio for automatic production class machines. Efficient heat management, ease of use, compact footprint and accessible price are instrumental to the internationally successful HD range as trusted by many world-class companies. Series 3 advancements include 'FCV' (Formech Cycle View) control interface with 10" high resolution touch-screen. Machine cycle status is clearly visible at a glance and all parameters can be adjusted in real time without interrupting the current cycle. By working closely with HD customers all over the world Formech has developed an intuitive, graphically driven interface suitable for operators of all experience levels. Generous standard specification and an

extensive range of options including twin heaters for the most demanding materials mark the HD Series 3 as a cost effective and highly adaptable machine range. Apple Inc., Nestle and Cambridge University are amongst the first customers to benefit from Formech's HD Series 3.
